About AUREVIA

AUREVIA IKE is a Greek engineering company specializing in Industrial Refrigeration, HVAC-R and Industrial Ventilation Solutions.

We provide complete services including engineering, equipment selection, installation, commissioning and after-sales technical support, delivering reliable and energy-efficient solutions for industrial and agricultural facilities.

About KALE

KALE Fans is a leading manufacturer of High Volume Low Speed (**HVLS**) fans, offering innovative ventilation solutions for agriculture, livestock, industry and logistics.

Designed for **maximum airflow** and minimum energy consumption, KALE systems improve comfort, reduce heat stress and create healthier working and production environments.

OUR EXPERTISE

Engineering	HVLS Systems	HVAC-R

WHY HVLS FANS?

High Volume Low Speed (HVLS) fans improve airflow, reduce energy consumption and create healthier, more comfortable environments for people, animals and industrial processes.

Reduced Heat Stress

Maintains a cooler and more stable environment for people, animals and equipment.

Lower Energy Consumption

Large air coverage with significantly lower power consumption compared to multiple conventional fans.

Improved Air Circulation

Creates uniform airflow throughout the facility, eliminating stagnant air and improving ventilation.

Better Animal Welfare

Provides a healthier environment by reducing heat stress and improving animal comfort and productivity.

Better Air Quality

Continuous air movement helps reduce humidity, odors, dust and airborne contaminants.

Low Maintenance

Maintenance-free PMSM motor technology ensures reliable operation, low maintenance costs and long service life.

OUR SOLUTIONS

Complete ventilation solutions designed for every type of industrial and agricultural facility.

Warehouses & Distribution Centers

High-volume air circulation for warehouses, logistics centers and distribution facilities.

Industrial Manufacturing

Reliable ventilation solutions for production areas, factories and industrial facilities.

Livestock & Dairy Farms

Efficient airflow solutions that improve animal comfort, productivity and overall farm conditions.

Poultry Houses

Optimized ventilation systems that reduce heat stress and maintain healthy conditions for poultry production.

Greenhouses

Uniform air circulation to improve crop conditions, temperature control and greenhouse efficiency.

Logistics Centers

High-performance ventilation solutions for logistics hubs, storage facilities and distribution centers.

WHY AUREVIA

From engineering study to installation and after-sales support, AUREVIA delivers complete HVAC-R and ventilation solutions tailored to your facility.

Engineering & Design

Every project starts with a detailed engineering study to ensure the right ventilation solution for your facility.

Professional Installation

Installation and commissioning performed by experienced engineers, ensuring reliable and efficient system operation.

Technical Support & Service

Preventive maintenance, technical support and fast response to keep your systems operating at peak performance.

Official KALE Partner

Official partner for KALE HVLS ventilation solutions, providing expert consultation, system selection and complete project support across Greece.

CONTACT US

Let's discuss your next ventilation project.
